

Partendo dalle esigenze del prodotto, sono stati disegnati e creati tutti gli elementi indispensabili per poter mantenere al meglio i prodotti di altissima qualità. Ogni accessorio della cantina è stato ideato e progettato specificatamente per il contenuto che andrà a conservare. Questo per garantire uno stoccaggio ottimale che soddisfi esigenze estetiche, e pratiche, anche nell'impiego e uso professionale.

Sono stati quindi realizzati vari accessori (ripiani in legno massello, e ripiani in acciaio inox) pensati per sistemi di stoccaggio differenti e concepiti per l'organizzazione ottimale degli spazi e l'esposizione corretta dei prodotti.

All components are designed and built with the product's necessities in mind, in order to ensure the perfect preservation of even the most demanding products. Each of the cabinets' accessories is specifically designed for the content that will be stored and preserved, making sure that storage capacity will meet all practical and aesthetic demands, even in professional use.

Accessories such as solid wood shelves and stainless steel shelves are custom-designed and purpose-made for each storage system, aiming at efficient organization of space and proper presentation of goods.

Per riprodurre quello che avviene nelle antiche cantine, è necessario costruire l'ambiente adatto ad ogni esigenza, selezionando i materiali giusti e calibrando la corretta posizione dei prodotti contenuti.

To replicate the same feeling as the cellars of old, we must place care in creating the right environment, selecting the best materials and carefully positioning the contents.

Supporto in legno massello per esposizione a 45°
Solid wood support for inclined display

Ripiano scorrevole in legno massello
Solid wood sliding shelf

**Supporto in acciaio inox
per lo stoccaggio dei salumi**
Stainless steel frame
for hanging cured meat

Ripiani in acciaio inox con cornice in legno massello
per la conservazione di ortaggi e formaggi
Stainless steel shelves framed in solid wood
for stashing vegetables and cheese

Umidificatore per mantenimento costante dell'umidità
Humidifier to ensure the constant humidity level

Cassetti scorrevoli in legno massello e vassoi per sigari sfusi
Solid wood sliding shelves and trays for unboxed cigars

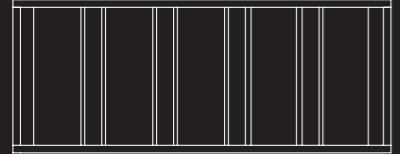

Quando si condividono vini o cibi selezionati con cura, è importante avere il bicchiere giusto, il tagliere e i coltelli adatti. Tutto deve essere curato nei minimi dettagli.

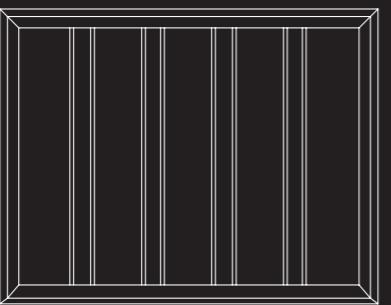

Serving carefully selected wines or delicacies requires the proper glass, a suitable cutting board and the right knives. Great care must be placed in every detail.

Modularità e flessibilità

Sistemi di Esposizione, Stoccaggio e Conservazione Vino
Progettazione e Arredamento Cantine

Data la sua versatilità, la cantina consente eccellenti combinazioni d'uso grazie ad un sistema di refrigerazione a celle distinte. Esse consentono di regolare le giuste temperature in modo indipendente. Il design armonico consente di effettuare qualsiasi tipo di personalizzazione senza modificare l'estetica elegante dei prodotti IPS.

Thanks to its versatility and to a separate refrigeration system for each compartment, the cabinet is perfectly suited for many combinations of use. The harmonized design allows for customization across the range, without altering IPS's signature elegance.

- Allestimento dispensa - salumi e vino
- Larder, cured meats and wine configuration

**La cantina non è un oggetto da nascondere:
vogliamo che diventi un complemento
d'arredo, esteticamente gradevole, piacevole
da utilizzare e da guardare, e che possa
esaltare il suo contenuto e valorizzare gli
ambienti della casa che la accoglieranno.**

The cabinet is not a thing to be hidden from sight: we want it to become a part of the décor in its own right, esthetically appealing, pleasant to use and watch; we want it to exalt its contents and adorn the room that hosts it.
